

## News Release

### Wavestream Names Terry Magee as Executive Vice President

**San Dimas, California, December 14, 2009** – Wavestream Corporation announced today that Terry Magee has joined the company as executive vice president, with responsibilities for business development, sales, marketing and product management.

“Terry brings significant leadership and management experience to the corporation, and will be an integral part of the development and execution of business and market strategies to take the company forward,” stated Cliff Cooke, president and chief executive officer of Wavestream.

Mr. Magee’s distinguished career is marked by 27 years of service in the U.S. Navy as a Naval aviator with extensive operational experience and tours on staffs and in the Pentagon. His four command tours included command of two Aviation Squadrons on the Duluth and the Kitty Hawk.

Mr. Magee subsequently served as president of Orincon, overseeing significant sales and market growth until the company’s acquisition by Lockheed Martin. He has since served in senior operational and strategic positions with Lockheed Martin, including the development and execution of capture plans for numerous large programs and C4ISR/IT Maritime Strategies and Campaigns.

Mr. Magee holds an MBA from the Naval Postgraduate School, and a BA in Biology from SUNY Brockport. He is active in several professional organizations, including AFCEA, San Diego Military Advisory Council and Tailhook, and community organizations, including Operation Home Front, United Through Reading, Palomar College Foundation and Achievement Rewards for College Students.

#### About Wavestream

Wavestream designs and manufactures next generation solid-state power amplifiers for mission-critical defense and broadcast satellite communications systems.

The company’s innovative, patented Spatial Power Advantage technology provides higher output power, greater reliability and lower energy usage in more compact packages than traditional amplifier solutions. Wavestream’s proven family of products meet the growing demand for greater efficiencies and significant lifecycle cost reductions for satellite communications systems worldwide.
